### DETAILED ACTION

This Office Action is in response to a Response filed on 9/6/2005.

Currently, claims 1-3 are pending.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Jang et al. (U.S. Patent No. 5,702,977 dated 12/30/1997).

Jang shows the method as claimed in Fig. 3-8, and corresponding text as: a first step for forming at least a region dividing groove (trench) (28) for separating the surface of a semiconductor substrate (30) into a first region constituting an active region of a relatively large area and a second region constituting an active region of a relatively small area (col. 5, lines 42-54); a second step for forming an insulating film (42) on the surface of the semiconductor substrate including the interior of the region dividing groove (col. 9, line 56-col. 10, line 2); a third step for etching the insulating film using an etching mask (34) having a lattice window pattern (40) in such a manner that lattice openings corresponding to the lattice window pattern are formed in the first region (col. 10, lines 29-47); and a fourth step for polishing off the insulating film remaining on the semiconductor substrate (col. 10, lines 29-47) (claim 1).

***Allowable Subject Matter***

1. Claims 2-3 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:  
...a third step for etching the insulating film using an etching mask having a single opening pattern and a lattice window pattern in such a manner that a single opening corresponding to the single opening pattern is formed in the first region and lattice openings corresponding to the lattice window pattern are formed in the second region, as required by claim 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

3. Applicant's arguments filed 9/6/2005 have been fully considered but they are not persuasive. The examiner views the term "lattice window" is analogies to "mask opening" and would be anticipated by the teachings of Jang.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
